Política de Acesso EuroHPC

EuroHPC JOINT UNDERTAKING

DECISION OF THE GOVERNING BOARD OF THE

EuroHPC JOINT UNDERTAKING No 25/2021

Amendment of the Access Policy to the Union's share on the access time to the pre-exascale and petascale supercomputers

PREFACE	7
Scope of the document	7
1 INTRODUCTION	8
2 PROCESS FOR THE ALLOCATION OF THE UNION'S ACCESS TIME TO EUROHPC SUPERCOMPUTERS.....	9
3 ACCESS MODES.....	17
4 ACCESS POLICY IMPLEMENTATION	28
5 ANNEX 1 - ACCESS POLICY PROVISIONS IN THE EUROHPC REGULATION	32

1.1 REGULATORY FRAMEWORK

This Access Policy is developed in the scope of the **Council Regulation (EC) 2018/1488** of the establishment of the EuroHPC JU and concerns the access time allocated to supercomputers procured in the context of this regulation. The Regulation sets the framework for the different aspects that affect the access policy to the EuroHPC infrastructure. A summary of the Regulation articles which are applicable to this policy are available in the annex at the end of this document.

1.2 PRINCIPLES OF THE ACCESS POLICY

The aim of the EuroHPC Access Policy is to provide a transparent and fair access to all users a fair chance to the Union's access time and takes into account all available resources. The guiding principles of this framework are set out in the Policy and its Annexes. The following list is a breakdown of recital 31 of the Regulation which outlines these key principles of the procedures described in the Policy.

- The use of the pre-exascale and petascale supercomputers should be primarily for public research and innovation purposes, for any user from academia, industry or the public sector.
- User allocation of access time to the supercomputers should primarily be based on open calls for expression of interest launched by the Joint Undertaking and evaluated by independent experts.
- Upon decision by the Governing Board, it should be possible to grant a small percentage of access time without a call for expression of interest in some exceptional cases such as strategic European initiatives or in emergency and crisis management situations.
- The Joint Undertaking should be allowed to carry out some limited economic activities for commercial purposes.
- Access should be granted to users established in the Union or a country associated to Horizon 2020.
- The access rights should be equitable to any user and allocated in a transparent manner.
- The Governing Board should define and monitor the access rights to the Union's share of access time for each supercomputer.

Política de Acesso EuroHPC: Alocação de recursos

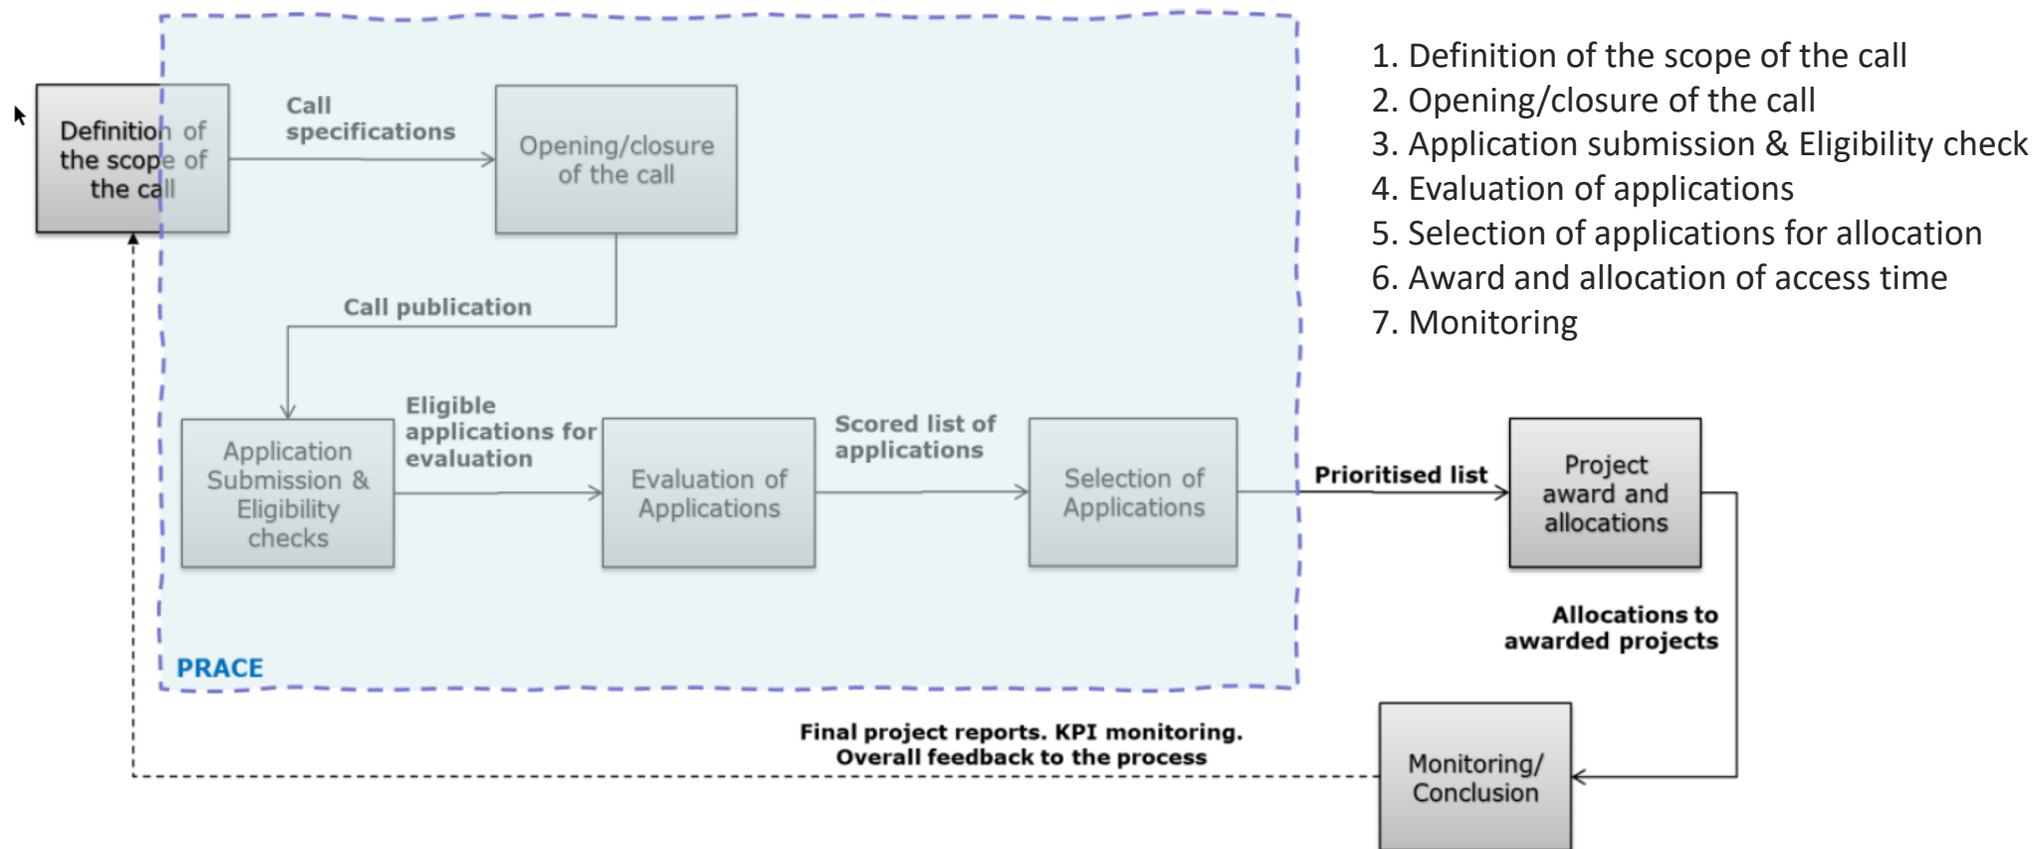

Figure 2 - Processes supported by PRACE in 2021

Política de Acesso EuroHPC: Modos de acesso

Access Mode	Extreme Scale	Regular	Benchmark	Development	Academic Fast Track	Industry Fast Track
Duration	1y renewable	1y renewable	2 to 3 months	1y renewable	< 6 months	1y renewable
Periodicity	Continuous calls, bi-yearly cut-offs	Continuous call, cut-offs every four months (3 cut-offs per year).	Continuous call, monthly cut-offs	Continuous call, monthly cut-offs	Continuous call, cut-offs ev. 2w/1m	Continuous call, cut-offs ev. 2w/1m
Share of resources (indicative)	60 - 90% of participating systems Mostly pre-exascale	60 - 90% of participating systems Mostly petascale	~5% All systems	~5% All systems	~5% All systems	~5% All systems
External sc. Peer-review	Yes	Yes	No	No	No / Pre-identified	No / Pre-identified
Tech. assessment	Yes	Yes	Yes	Yes	Yes	Yes
Data Management Plan required	Yes	Yes	No	No	Yes	Yes
Application type	Full application	Full application	Technical application	Technical application	Light request + support documents	Full application
Prerequisite	Benchmark	Benchmark	None	None	Previous allocation or Benchmark	Previous allocation or Benchmark
Submission period	> 2 months	> 2 months	N/A	N/A	N/A	N/A
Duration of evaluation process	3 months	2 months	≥1 week <2 weeks	≥1 week <2 weeks	≥2 weeks <1 month	≥2 weeks <1 month

No que diz respeito à Indústria, existem dois tipos de acesso aos recursos EuroHPC:

- *“Research and Innovation (R&I) access” e “Commercial Access”*

Commercial Access

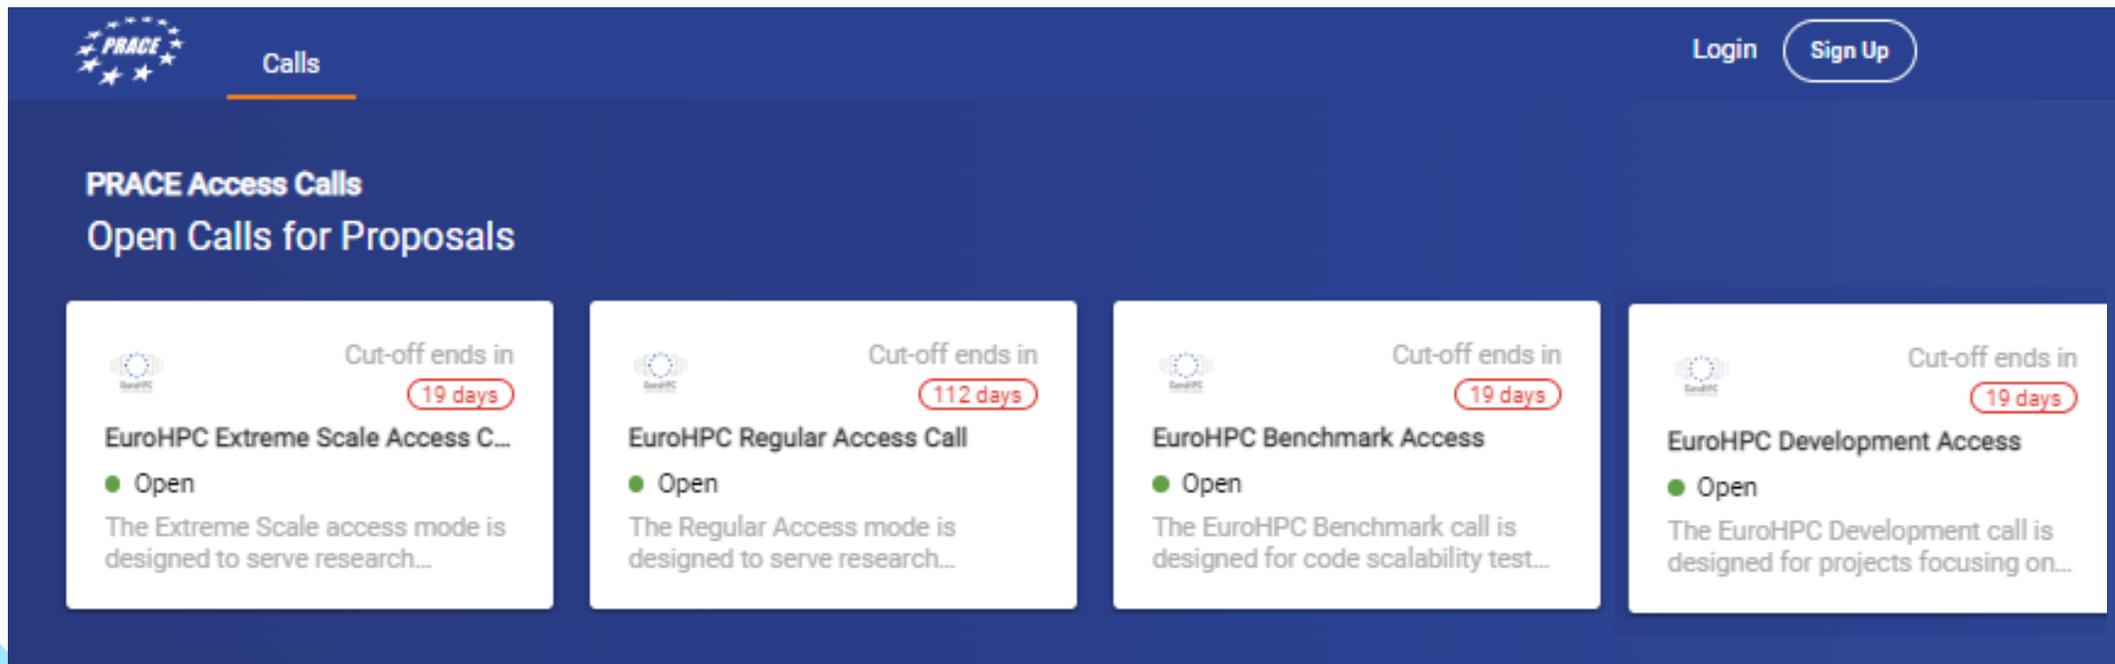

- De acordo com o regulamento, a JU **reservará até 20% dos recursos de computação disponíveis para fins comerciais.**
- **Este acesso não se enquadra em qualquer processo de avaliação científica.**

Category	Type	Cost unit
Computation	CPU Nodes	Node-hours
Computation	GPU Nodes	Node-hours
Computation	FPGA Nodes	Node-hours
Computation	High-memory nodes	Node-hours
Storage	Fast access tier	Gigabyte (GB) / month
Storage	Regular access tier	Gigabyte (GB) / month
Storage	Archive tier	Gigabyte (GB) / month
Network	Outbound and Inbound data transfer	Gigabyte (GB) / month
Support	Application porting and optimisation	Person Months (PM)
Support	Training	Hours

Portal de candidaturas

 pracecalls.eu

The screenshot shows the PRACE Access Calls website interface. At the top left is the PRACE logo with the text "PRACE" and "REDE NACIONAL DE COMPUTAÇÃO AVANÇADA". To the right of the logo is a "Calls" tab. Further right are "Login" and "Sign Up" buttons. The main heading is "PRACE Access Calls" followed by "Open Calls for Proposals". Below this, there are four call cards, each with the EuroHPC logo, a "Cut-off ends in" timer, the call title, a status indicator (a green dot followed by "Open"), and a brief description.

Call Title	Cut-off ends in	Status
EuroHPC Extreme Scale Access C...	19 days	Open
EuroHPC Regular Access Call	112 days	Open
EuroHPC Benchmark Access	19 days	Open
EuroHPC Development Access	19 days	Open

Development Access

continuously open calls, designed for projects focusing on code and algorithm development and optimization; the allocation period is 1 year, renewable up to 2x.

Benchmark Access

continuously open calls, designed for code scalability tests, the outcome of which is to be included in the proposal in a future Extreme Scale and Regular Access call. maximum allocation period is 3 months.

Regular Access

continuously open; designed to serve projects that require large-scale resources or more frequent access to substantial computing and storage resources. Resources mostly from the EuroHPC JU petascale systems. 1 year allocations with additional extra year.

Extreme Access

continuously open; designed to serve projects with high-impact, high-gain innovative research; extremely large allocations in terms of compute time, data storage and support resources. Resources from the EuroHPC pre-exascale systems. 1 year allocations with additional extra year.

[PRACE \(prace-ri.eu\)](http://prace-ri.eu)

PROJECT ACCESS

PRACE Project Access is the access to PRACE Tier-0 HPC systems for projects that use previously tested codes with demonstrated high scalability and optimisation.

Suitable for
Established Tier-0 users

Development Access Benchmark Access

SHAPE ACCESS

SHAPE aims to help SMEs benefit from the expertise and knowledge developed within the PRACE RI.

Suitable for
SMEs with the potential of using HPC.

DECI ACCESS

DECI provides Tier-1 users access to supercomputing architectures from another European country for smaller-scale projects.

Suitable for
Smaller-scale projects that do not require Tier-0 systems
