HPE: Unlock AI from Edge to Exascale together with AMD

Wednesday 7 May 2025 17:45 (15 minutes)

In this session from HPE and AMD we will showcase the latest joint developments for Artificial Intelligence, from edge-glued Inference environments: where the data is produced, to the largest AI systems in the world and in Europe: El Capitan, Frontier, LUMI and ENI (Europe's largest supercomputer)

We will show how the hardware and software innovation of HPE and AMD with technologies such as AMD EPYC, AMD Instinct, HPE Slingshot, 100% fanless liquid cooling systems and modular data centers for AI: HPE AI ModPod can serve as a basis for the Portuguese scientific and technological ecosystem to lead the new era of AI Factories.

Presenter: GALANO, Adriano

Session Classification: Democratizar a IA: tornar a Inteligência Artificial acessível a todos
